

# The Roof of Earth

A spaceship was passing by Earth, and then suddenly Roshuto saw something and said...

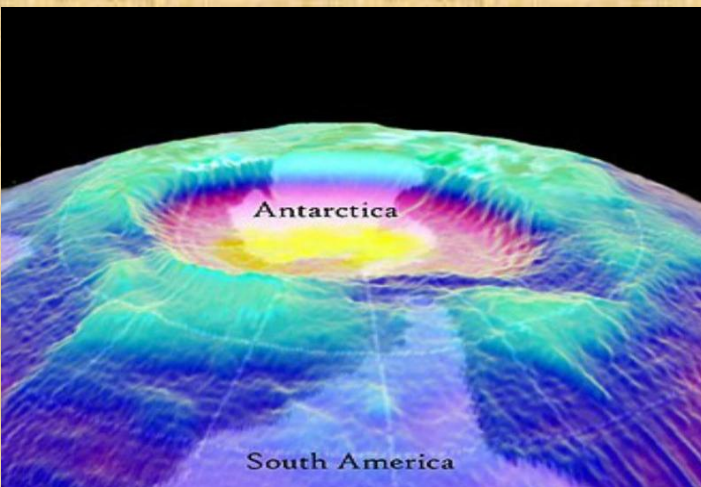

Yes it is a huge ozone hole.

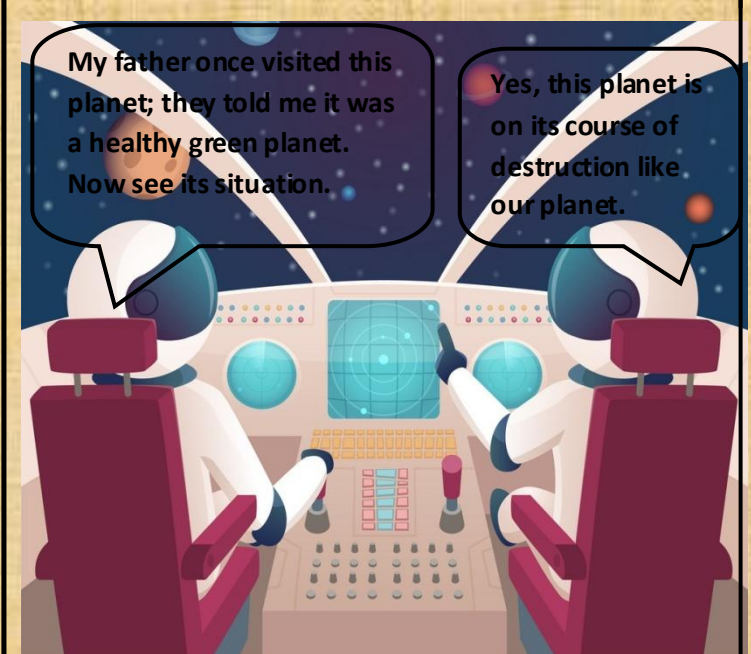

Hey! You saw that, it is too huge. I didn't expect it to be here.

Thampu

Roshuto

See this I scanned it, the layer has been damaged too much. – (Thampu)

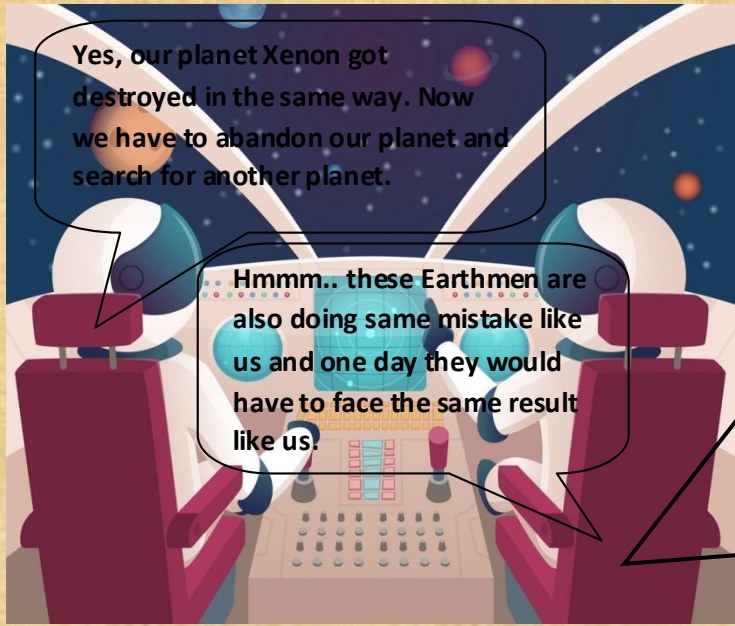

My father once visited this planet; they told me it was a healthy green planet. Now see its situation.

Yes, this planet is on its course of destruction like our planet.

Thampu

Roshuto

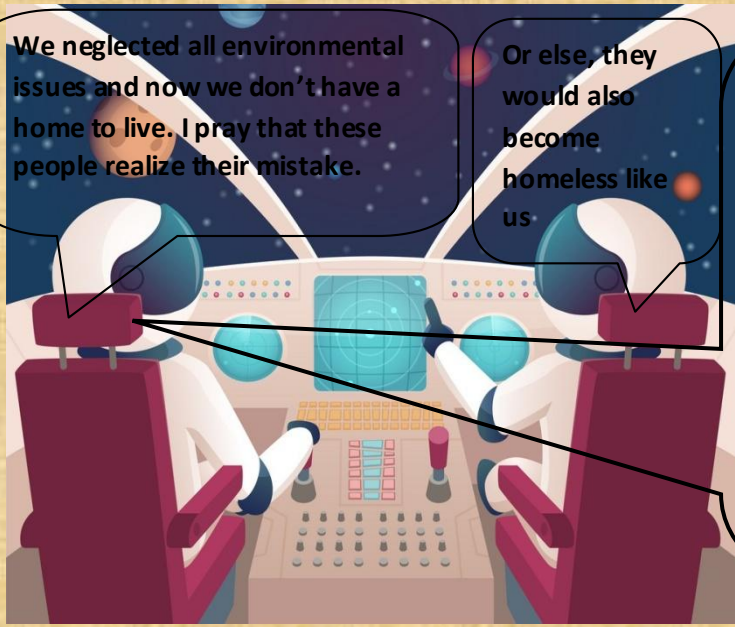

Yes, our planet Xenon got destroyed in the same way. Now we have to abandon our planet and search for another planet.

Hmmm.. these Earthmen are also doing same mistake like us and one day they would have to face the same result like us.

Earth in 2157.....

We neglected all environmental issues and now we don't have a home to live. I pray that these people realize their mistake.

Or else, they would also become homeless like us

Let's go and find a new habitual planet.

THE END

Earth without Ozone is  
Like a house without roof.

WORLD

ENVIRONMENT

DAY

*Save Ozone Layer*
